DISK DRIVE CLEANING KITS

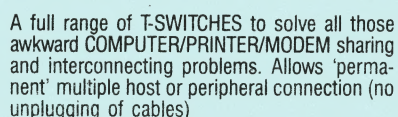

Clean your floppy disk drive head in seconds... before oxide build-up shuts your system down. Dust, dirt and debris can easily contaminate a system's flexible disk drives. This can result in vital data loss, cause errors, and hinder a systems performance.

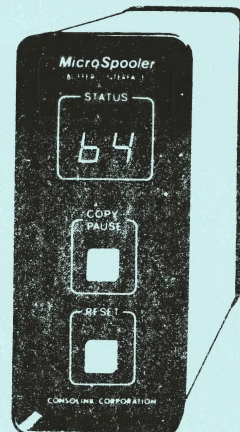

Head Cleaning Kits can remove most of the debris contaminating drive heads. Minimize costly professional cleaning calls. Quick and easy to use with no cleaning mess.

With a buffer, you no longer have to wait on the printer. The buffer stores data, then supplies it at a speed the printer can handle. Saves waiting time; in only a matter of seconds your computer is free to start the next job, no waiting for the printer to complete the previous work. Stores up to 30-40 pages. Has multiple copy function.

```

The WORD EXPRESS VLS 481 is designed to convert a computer's RS232 SERIAL output into a PARALLEL output. This PARALLEL output will then drive a CENTRONICS PARALLEL Printer, Plotter or Electronic Typewriter.

ANY EQUIPMENT WITH A PARALLEL INPUT CAN BE DRIVEN FROM A COMPUTER'S SERIAL PORT.

The LIPTON VLS 481 is normally supplied with a power supply (240v AC), but it can optionally be powered directly from the Parallel printer via the Printer cable.

Provision is made for the user to set the Baud Rate to 150, 300, 600, 1200, 2400, 4800, 9600 Baud: Word Length = 7 or 8 Bits: Parity = Even, Odd or None: Stop bits = 1 or 2.
